LITTER BINS

Barcelona 220 L City

FEATURES

- The Barcelona litter bin has a special powdered polyester finish, robotapplied and finished by an automatic baking process.
- All parts have been corrosion-treated by cataphoresis, which means the unit will have high resistance to extreme weather conditions plus it will not suffer from rust points.
- All the baskets have a 110 litre capacity, are manufactured from 1.5 mm thick perforated steel plate, reinforced with two 30 x 15 x 1.5 mm oval profile steel tubes on the upper and lower sections.
- The fork bracket supporting the basket consists of side and central mounting posts comprising: an oval shaped tube 60 x 30 x 2 mm thick and a tube which joins the three mounting posts made from a rectangular tube 60 x 40 x 2 mm thick.
- It is easily and securely fixed in place by four 12mm diameter universal expansion anchoring bolts.
- Ashtray can be supplied on request.
