01.

ENVIRONMENTAL SUSTAINABILITY POLICY

Our goal is to promote our contribution to sustainable development at **CONTENUR**. Our environmental practices, in addition to comply with applicable legal and regulatory requirements and others to which we subscribe, must reduce potential impacts on the environment throughout our value chain.

The Management of **CONTENUR** is committed to implementing a management system that allows the organization to know, understand, implement and review this Policy, which is the framework of reference for our environmental objectives.

02.

THE AXES OF OUR ENVIRONMENTAL POLICY

- To reduce the consumption of natural resources, promoting eco-design and minimising the consumption of energy, water and other resources.
- Increase the use of renewable and recyclable resources, maximising, among others, the use of recycled materials and renewable energies.
- Reduce emissions to the environment.
- To reduce the amount of waste generated and promote its recycling.
- Maintain the value of products, increasing their durability and facilitating their maintenance and recyclability.

We are also committed to extending our sustainability culture throughout our value chain, and to communicating our circularity improvement actions to our stakeholders.
