SIDE-LOADING CONTAINER

CL360

FEATURES

- The CL360 is designed **to blend perfectly into any environment,** with a maximum height of 1,475 mm, so that it does not constitute a visual obstruction and enables pedestrians to have a perfect view of the road, street or vehicles.
- Body and lids manufactured using a **high-density polyethylene** moulding system.
- Designed to contain **smart elements.**

CERTIFICATION

- **100% recyclable** at the end of its useful life and manufactured with up to 77% of recycled material.
- **Universal Accessibility** Regulation **170001.**
- Product **approval** certificate (GS) issued by TÜV Product Service GmbH in compliance with European Regulation **EN 12574.**

EQUIPMENT

- **Reduced height openings for loading** with dimensions and features studied individually for every application to make the container easy to use.
- Recess for the installation of **electronic chips**.
- Possibility of equipping it with a **variety of accessories** to provide specific, tailor-made solutions for every need: reflective strips, shock absorber, lid in lid, electronic lock, access control system, filling control system, alignment system, etc.
- Full opening of the user lid **> 450 mm.**
- Pedal forming part of the container, as it is enveloping, it does not cause an obstruction and thus enables users **to open the lids without subjecting the components to any stress.**
- **Standard customisation** on the body by hot stamping with maximum dimensions of 400 x 400 mm.
- **Premium customisation** on the body by hot stamping with maximum dimensions of 725 x 380 mm.
- **Versions for each type of waste** collection: paper and cardboard, glass, packaging, organic and SUW.
- **Possibility** of equipping the container with a **rectangular opening** for the paper fraction.
  Dimensions available:
  · 975 x 200 mm
- **Circular openings** for the different fractions.
  Diameters available:
  · 200 mm
  · 400 mm
