CRANE-LIFT CONTAINER

360IGLOO

FEATURES

- The 360 crane-lift and side-loading containers maintain a uniform aesthetic line, thereby ensuring that the islands to be installed in the public thoroughfare blend in perfectly, **guaranteeing greater standardisation and less visual impact.**
- The bell-shaped containers and lower doors have been manufactured using a high-density polyethylene moulding system that is **stabilised against the combined action of water and UV rays.**
- The metal lifting system is corrosion proof. It is available for different systems: **double hook, Kinshofer and F90.**
- Lids manufactured using a **high-density polyethylene moulding system.**

CERTIFICATION

- Container designed in compliance with **Regulation EN-13071.**
- **CE** marking in compliance with European Directive **2000/14/CE - 96dB.**
- **100% recyclable** at the end of its useful life and manufactured using up to 77% of recycled material.

EQUIPMENT

- **Reduced height openings** for loading with dimensions and features studied individually for every application to make the container easy to use.
- Recess for the installation of **electronic chips.**
- Possibility of **customising** the igloo with a variety of accessories, to provide specific, tailor-made solutions adapted to every need: reflective strips, manual locking, large producer systems, etc.
- User openings at a height of 1,195 mm to provide **greater accessibility.**
- **Standard customisation** on the body by hot stamping with maximum dimensions of 400 x 400 mm.
- **Premium customisation** on the body by hot stamping with maximum dimensions of 725 x 380 mm.
- Possibility of equipping the container with a **rectangular opening** for the paper fraction. Dimensions available:

  · 975 x 200 mm
- **Circular openings** for the different fractions. Diameters available:

  · 200 mm
  · 400 mm
- Versions for **each type of waste** collection: paper and cardboard, glass, packages, organic and SUW.
